

Within the Jean Monnet project - Lifelong Learning Programme promoted by the European Commission, The Department of Social Sciences and Economics, University La Sapienza of Rome together with the European Observatory and the University for Europe are pleased to invite you to attend the third meeting of the series of seminars "EU Observer Connecting worlds to promote 'European Education Among universities, schools, and civil society Organizations".

One of the most discussed topics in the context of the European Union is the need for a real Political Union, consistent with the aims and objectives of the Union itself. The conference aims to identify which tools are best suited to promote a different and greater involvement of civil society in the European processes and to investigate the possible impact of such an involvement on the actual achievement of the common goals of the EU members. Schools and universities, cultivating knowledge, can significantly contribute to the dissemination, application and formation on European issues and topics, contributing to the development of a real Political Union of the Citizens.
